Subject Index of Volume 249

Adsorption
  grand canonical ensemble Monte Carlo simulations of adsorption in energetically heterogeneous slit-like pores, 236
Aluminium
  determination of W–Ti/Al thin-film interaction by sheet resistance measurement, 6
Anisotropy
  method for the measurement of the thermal conductivity tensor in thin layers, 245
Anodic oxidation
  on the influence of an ultrathin Al overlayer on GaAs plasma oxide growth kinetics, 44
Antimony
  optical properties of Sb and SbO_x films, 195
Atomic force microscopy
  atomic force microscopy study of the microroughness of SiC thin films, 38
  surface roughness reduction in atomic layer epitaxy growth of titanium dioxide thin films, 155
Atomic layer epitaxy
  surface roughness reduction in atomic layer epitaxy growth of titanium dioxide thin films, 155
Auger electron spectroscopy
  structural behaviour of direct-current sputtered and thermally evaporated molybdenum thin films, 150

Blends
  effect of blend composition on the pyroelectric behaviour of cellulose acetate–polyvinyl acetate polymer blend films, 241

Cadmium sulphide
  $Zn_xCd_{1-x}S$ thin films grown by ion-beam deposition, 91
Cadmium telluride
  In situ characterization of rare earth–CdTe heterostructures by ion beam analysis, 266
Carbides
  growth behaviour of vanadium carbide coatings on steel substrates by a salt bath immersion coating process, 54
  vanadocene used as a precursor for the chemical vapour deposition of vanadium carbide at atmospheric pressure, 62
Ceramics
  ion beam mixing modification of sputter-deposited molybdenum films on Si_3N_4 ceramics, 183
Chemical vapour deposition
  mechanism of interaction between Cl-containing gaseous phase and cemented carbides in the chemical vapour deposition process, 174
  non-selective copper film growth on Kapton (polyimide) by MOCVD, 22
  research on YSZ thin films prepared by plasma-CVD process, 163
Coatings
  organic gas sorption by chemical-sensing fluoropolymer films prepared by radio-frequency sputtering, 118
  vanadocene used as a precursor for the chemical vapour deposition of vanadium carbide at atmospheric pressure, 62
Computer simulation
  grand canonical ensemble Monte Carlo simulations of adsorption in energetically heterogeneous slit-like pores, 236
  method for the measurement of the thermal conductivity tensor in thin layers, 245
Conductivity
  physical properties of a mixed conducting Langmuir–Blodgett film based on tetrathiafulvalene derivative with or without iodine oxidation, 210
Contacts
  Fermi level pinning by various metal Schottky contacts on (100) OMVPE-grown n-GaAs, 95
Copper
  non-selective copper film growth on Kapton (polyimide) by MOCVD, 22
Crystallization
  grain growth of laser-recrystallized polycrystalline and amorphous silicon films, 224
Cuprous oxide
  electron spectroscopy for chemical analysis studies on electron beam evaporated CuO_x thin films, 140

Deposition process
  binding energies for carbon atoms and clusters deposited on the Si(100) surface, 78
  controlled growth of tin dioxide thin films by atomic layer epitaxy, 144
  growth behaviour of vanadium carbide coatings on steel substrates by a salt bath immersion coating process, 54
  pulsed laser deposition of strontium titanate thin films for dynamic random access memory applications, 100
  solution growth of As_2S_3 thin films from a thioacetamide bath, 135
Depth profiling
  structure and photoelectrical behaviour of vacuum-evaporated metal-free phthalocyanine films, 230
Diamond
  binding energies for carbon atoms and clusters deposited on the Si(100) surface, 78
Dielectric properties
  alkoxy-derived Y_2O_3-stabilized ZrO_2 thin films, 1
  properties of liquid-phase-deposited SiO_2 films for interlayer dielectrics in ultralarge-scale integrated circuit multilevel interconnections, 15
  pulsed laser deposition of strontium titanate thin films for dynamic random access memory applications, 100
Diffusion
  determination of W–Ti/Al thin-film interaction by sheet resistance measurement, 6
  growth behaviour of vanadium carbide coatings on steel substrates by a salt bath immersion coating process, 54
  in situ X-ray diffraction measurements of silicide formation in the Co–Si system, 187
  interaction kinetics and compound formation between electroless Ni–P and solder, 201

Electrical properties and measurements
  determination of W–Ti/Al thin-film interaction by sheet resistance measurement, 6

effect of ion bombardment on some properties of a-$Si_{0.8}Ge_{0.2}$:H alloys prepared by ion beam-assisted reactive evaporation, 254
effect of temperature on photoconduction and low frequency capacitance measurements on β-CuPc photovoltaic cells, 219
Fermi level pinning by various metal Schottky contacts on (100) OMVPE-grown n-GaAs, 95
Electron diffraction
structural behaviour of direct-current sputtered and thermally evaporated molybdenum thin films, 150
Ellipsometry
alkoxy-derived Y_2O_3-stabilized ZrO_2 thin films, 1
optical properties of Sb and SbO_x films, 195
Epitaxy
method for the measurement of the thermal conductivity tensor in thin layers, 245
transmission electron microscopic study of titanium silicides fabricated by implantation of titanium into silicon and thermal annealing, 50

Fluorine
properties of liquid-phase-deposited SiO_2 films for interlayer dielectrics in ultralarge-scale integrated circuit multilevel interconnections, 15
Fourier transform infrared spectroscopy
mechanisms of plasma polymerization of various silico-organic monomers, 28
physical properties of a mixed conducting Langmuir–Blodgett film based on tetrathiafulvalene derivative with or without iodine oxidation, 210

Gallium arsenide
characterization of WN_x metallization prepared by ion implantation of nitrogen, 250
Fermi level pinning by various metal Schottky contacts on (100) OMVPE-grown n-GaAs, 95
on the influence of an ultrathin Al overlayer on GaAs plasma oxide growth kinetics, 44
Germanium
effect of ion bombardment on some properties of a-$Si_{0.8}Ge_{0.2}$:H alloys prepared by ion beam-assisted reactive evaporation, 254
Growth mechanism
grain growth of laser-recrystallized polycrystalline and amorphous silicon films, 224
in situ X-ray diffraction measurements of silicide formation in the Co–Si system, 187
interaction kinetics and compound formation between electroless Ni–P and solder, 201
on the influence of an ultrathin Al overlayer on GaAs plasma oxide growth kinetics, 44

Heterostructures
in situ characterization of rare earth–CdTe heterostructures by ion beam analysis, 266

Impurities
determination of W–Ti/Al thin-film interaction by sheet resistance measurement, 6
grand canonical ensemble Monte Carlo simulations of adsorption in energetically heterogeneous slit-like pores, 236

Insulators
properties of liquid-phase-deposited SiO_2 films for interlayer dielectrics in ultralarge-scale integrated circuit multilevel interconnections, 15
Interfaces
interaction kinetics and compound formation between electroless Ni–P and solder, 201
Ion bombardment
determination of thin foil thickness inhomogeneities by analysis of ion beam energy loss spectra, 11
$Zn_xCd_{1-x}S$ thin films grown by ion-beam deposition, 91
Ion implantation
characterization of WN_x metallization prepared by ion implantation of nitrogen, 250
ion beam mixing modification of sputter-deposited molybdenum films on Si_3N_4 ceramics, 183
transmission electron microscopic study of titanium silicides fabricated by implantation of titanium into silicon and thermal annealing, 50
Iron oxide
preparation of ultrathin ferric oxide layers using Langmuir–Blodgett films, 113

Langmuir–Blodgett films
lateral intermolecular interaction in Langmuir–Blodgett films of octa-alkyl hydrogen phthalocyanines, 109
preparation of ultrathin ferric oxide layers using Langmuir–Blodgett films, 113
physical properties of a mixed conducting Langmuir–Blodgett film based on tetrathiafulvalene derivative with or without iodine oxidation, 210
Laser ablation
atomic force microscopy study of the microroughness of SiC thin films, 38
Lattice parameters
on the influence of an ultrathin Al overlayer on GaAs plasma oxide growth kinetics, 44
Luminescence
dispersive optical bisability in ZnS–ZnTe strained-layer superlattices grown on transparent substrates BaF_2 by MOCVD, 207
excitonic optical bistability in ZnSe/ZnS planar waveguide, 83

Manganese
determination of thin foil thickness inhomogeneities by analysis of ion beam energy loss spectra, 11
Metallization
non-selective copper film growth on Kapton (polyimide) by MOCVD, 22
Metals
room temperature formation and stability of compounds in metal couples of bulk-film type, 168
Molecular beam epitaxy
electron spectroscopy for chemical analysis studies on electron beam evaporated CuO_x thin films, 140
in situ characterization of rare earth–CdTe heterostructures by ion beam analysis, 266
Molybdenum
ion beam mixing modification of sputter-deposited molybdenum films on Si_3N_4 ceramics, 183
structural behaviour of direct-current sputtered and thermally evaporated molybdenum thin films, 150
Monolayers
preparation of ultrathin ferric oxide layers using Langmuir–Blodgett films, 113

Nucleation
grain growth of laser-recrystallized polycrystalline and amorphous silicon films, 224

Optical properties
dispersive optical bistability in ZnS–ZnTe strained-layer superlattices grown on transparent substrates BaF_2 by MOCVD, 207
effect of ion bombardment on some properties of a-$Si_{0.8}Ge_{0.2}$:H alloys prepared by ion beam-assisted reactive evaporation, 254
excitonic optical bistability in ZnSe/ZnS planar waveguide, 83
solution growth of As_2S_3 thin films from a thioacetamide bath, 135
studies on MgO-stabilized zirconia thin films in the UV–visible region, 86
$Zn_xCd_{1-x}S$ thin films grown by ion-beam deposition, 91
Optical spectroscopy
lateral intermolecular interaction in Langmuir–Blodgett films of octa-alkyl hydrogen phthalocyanines, 109
Organic substances
effect of temperature on photoconduction and low frequency capacitance measurements on β-CuPc photovoltaic cells, 219
structure and photoelectrical behaviour of vacuum-evaporated metal-free phthalocyanine films, 230
Organometallic vapour deposition
dispersive optical bistability in ZnS–ZnTe strained-layer superlattices grown on transparent substrates BaF_2 by MOCVD, 207
excitonic optical bistability in ZnSe/ZnS planar waveguide, 83
research on YSZ thin films prepared by plasma-CVD process, 163
vanadocene used as a precursor for the chemical vapour deposition of vanadium carbide at atmospheric pressure, 62
Oxides
alkoxy-derived Y_2O_3-stabilized ZrO_2 thin films, 1
optical properties of Sb and SbO_x films, 195
studies on MgO-stabilized zirconia thin films in the UV–visible region, 86

Phase transitions
grand canonical ensemble Monte Carlo simulations of adsorption in energetically heterogeneous slit-like pores, 236
Photovoltage
effect of temperature on photoconduction and low frequency capacitance measurements on β-CuPc photovoltaic cells, 219
structure and photoelectrical behaviour of vacuum-evaporated metal-free phthalocyanine films, 230
Physical vapour deposition
room temperature formation and stability of compounds in metal couples of bulk-film type, 168
Piezoelectric effect
effect of blend composition on the pyroelectric behaviour of cellulose acetate–polyvinyl acetate polymer blend films, 241
Plasma processing and deposition
atomic force microscopy study of the microroughness of SiC thin films, 38
mechanisms of plasma polymerization of various silico-organic monomers, 28
organic gas sorption by chemical-sensing fluoropolymer films prepared by radio-frequency sputtering, 118
research on YSZ thin films prepared by plasma-CVD process, 163
Polymers
effect of blend composition on the pyroelectric behaviour of cellulose acetate–polyvinyl acetate polymer blend films, 241
mechanisms of plasma polymerization of various silico-organic monomers, 28
non-selective copper film growth on Kapton (polyimide) by MOCVD, 22
Pyroelectricity
effect of blend composition on the pyroelectric behaviour of cellulose acetate–polyvinyl acetate polymer blend films, 241

Reaction kinetics
interaction kinetics and compound formation between electroless Ni–P and solder, 201
silicide formation in the Co–Si system by rapid thermal annealing, 126
Resistivity
silicide formation in the Co–Si system by rapid thermal annealing, 126
Rutherford backscattering spectroscopy
in situ characterization of rare earth–CdTe heterostructures by ion beam analysis, 266

Schottky barrier
effect of temperature on photoconduction and low frequency capacitance measurements on β-CuPc photovoltaic cells, 219
Fermi level pinning by various metal Schottky contacts on (100) OMVPE-grown n-GaAs, 95
Semiconductors
excitonic optical bistability in ZnSe/ZnS planar waveguide, 83
solution growth of As_2S_3 thin films from a thioacetamide bath, 135
Silicides
In situ X-ray diffraction measurements of silicide formation in the Co–Si system, 187
silicide formation in the Co–Si system by rapid thermal annealing, 126
transmission electron microscopic study of titanium silicides fabricated by implantation of titanium into silicon and thermal annealing, 50
Silicon
effect of ion bombardment on some properties of a-$Si_{0.8}Ge_{0.2}$:H alloys prepared by ion beam-assisted reactive evaporation, 254
Silicon carbide
atomic force microscopy study of the microroughness of SiC thin films, 38
Silicon nitride
ion beam mixing modification of sputter-deposited molybdenum films on Si_3N_4 ceramics, 183
Silicon oxide
properties of liquid-phase-deposited SiO_2 films for interlayer dielectrics in ultralarge-scale integrated circuit multilevel interconnections, 15
Silver
tribological properties of thin silver films sputter-deposited on superalloy substrates, 70

Sputtering
optical properties of Sb and SbO_x films, 195
structural behaviour of direct-current sputtered and thermally evaporated molybdenum thin films, 150
tribological properties of thin silver films sputter-deposited on superalloy substrates, 70
Strontium
pulsed laser deposition of strontium titanate thin films for dynamic random access memory applications, 100
Structural properties
characterization of WN_x metallization prepared by ion implantation of nitrogen, 250
pulsed laser deposition of strontium titanate thin films for dynamic random access memory applications, 100
room temperature formation and stability of compounds in metal couples of bulk-film type, 168
studies on MgO-stabilized zirconia thin films in the UV–visible region, 86
Sulphides
solution growth of As_2S_3 thin films from a thioacetamide bath, 135
Superconductivity
method for the measurement of the thermal conductivity tensor in thin layers, 245
Superlattices
dispersive optical bisability in ZnS–ZnTe strained-layer superlattices grown on transparent substrates BaF_2 by MOCVD, 207
Surface and interface states
ion beam mixing modification of sputter-deposited molybdenum films on Si_3N_4 ceramics, 183
organic gas sorption by chemical-sensing fluoropolymer films prepared by radio-frequency sputtering, 118
room temperature formation and stability of compounds in metal couples of bulk-film type, 168
Surface diffusion
organic gas sorption by chemical-sensing fluoropolymer films prepared by radio-frequency sputtering, 118
Surface morphology
growth behaviour of vanadium carbide coatings on steel substrates by a salt bath immersion coating process, 54
surface roughness reduction in atomic layer epitaxy growth of titanium dioxide thin films, 155
Surface roughness
determination of thin foil thickness inhomogeneities by analysis of ion beam energy loss spectra, 11

Tin oxide
controlled growth of tin dioxide thin films by atomic layer epitaxy, 144
Titanium
mechanism of interaction between Cl-containing gaseous phase and cemented carbides in the chemical vapour deposition process, 174
Titanium carbide
mechanism of interaction between Cl-containing gaseous phase and cemented carbides in the chemical vapour deposition process, 174
Titanium oxide
surface roughness reduction in atomic layer epitaxy growth of titanium dioxide thin films, 155
Transmission electron microscopy
transmission electron microscopic study of titanium silicides fabricated by implantation of titanium into silicon and thermal annealing, 50
Tribology
tribological properties of thin silver films sputter-deposited on superalloy substrates, 70
Tungsten
characterization of WN_x metallization prepared by ion implantation of nitrogen, 250

Vacancies
research on YSZ thin films prepared by plasma-CVD process, 163
Vanadium
vanadocene used as a precursor for the chemical vapour deposition of vanadium carbide at atmospheric pressure, 62

X-ray diffraction
alkoxy-derived Y_2O_3-stabilized ZrO_2 thin films, 1
controlled growth of tin dioxide thin films by atomic layer epitaxy, 144
grain growth of laser-recrystallized polycrystalline and amorphous silicon films, 224
in situ X-ray diffraction measurements of silicide formation in the Co–Si system, 187
silicide formation in the Co–Si system by rapid thermal annealing, 126
$Zn_xCd_{1-x}S$ thin films grown by ion-beam deposition, 91
X-ray photoelectron spectroscopy
electron spectroscopy for chemical analysis studies on electron beam evaporated CuO_x thin films, 140

Zirconium
studies on MgO-stabilized zirconia thin films in the UV–visible region, 86
